

FCC should not implement any proposal that would lessen Indiana's (or any other state's) Telephone Privacy law protections.

Indiana's laws have nearly stopped all unwanted telemarketing calls.

We would recieve one or more a day before the law.

This includes calls made by an automatic machine which calls numerous numbers at once and whoever doesn't answer first gets hung up on. This practice should be against the law.

Again, please do not infringe on the state's right to enact and enforce its own laws which do not impead on the constitution.
